The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB Panel for the Review of the EPA Water Body Connectivity Report will hold a public meeting to conduct a review of the EPA's draft report, *Connectivity of Streams and Wetlands to Downstream Waters: A Review and Synthesis of the Scientific Evidence (September, 2013 External Review Draft, EPA/600/R-11/098B)*. This SAB panel will provide advice to the Administrator through the chartered SAB.

Background

The EPA's Office of Research and Development (ORD) has developed a draft report reviewing and synthesizing the peer-reviewed scientific literature on the connectivity or isolation of streams and wetlands relative to large water bodies such as rivers, lakes, estuaries and oceans. The purpose of the report, *Connectivity of Streams and Wetlands to Downstream Waters: A Review and Synthesis of the Scientific Evidence (September, 2013 External Review Draft, EPA/600/R-11/098B)*, is to summarize the current understanding about these connections, the factors that influence them, and the mechanisms by which connected waters singly or in aggregate, affect the function of downstream waters.

The SAB Staff Office announced to the public through a *Federal Register* notice published on March 8, 2013 (78 FR 15012 – 15013) that it was soliciting nominations of scientific experts to serve on the SAB Panel for the Review of the EPA Water Body Connectivity Report. Information about the formation of this SAB Panel can be found on the SAB website at

http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgstr_activites/Watershed%20Connectivity%20Report?OpenDocument.

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. The intended use of comments submitted to the SAB is different from the purpose of comments submitted to the EPA's program offices. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Interested members of the public may submit relevant comments for the SAB Panel to consider pertaining to the review materials, including the charge to the Panel. Input from the public to the SAB Panel will have the most impact if it provides specific scientific or technical information or analysis for the SAB Panel to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide written comments may submit them to the EPA Docket electronically via www.regulations.gov, by e-mail, by mail, by facsimile, or by hand delivery/courier.
